25X1		Up to 11 a.a. on 25 May, there was no flying in rainy weather. The visibility was poor. Truck leaded with wooden poles. 3 meters long, entered to the field and moved to the southern border of the field where one pole each was dropped at intervals of about 10 meters. (3)
	5.	On 6 June, source observed that 50 to 60 jet fighters were parked at Puetnitz airfield. (4) Five hangars were also observed there. There was intensive flying in formations of 3 to 6 planes.
ŧ	6.	On 6 June, intensive air activity by jet fighters was observed at the field. (5)

25X1	(1)	
	(2)	This series on a 110 To be recented for the Similation. This helicard the
		This device on a MiC-15 is rejerted for the first time. It is believed to be electronic measuring instrument.
	(3)	The poles are probably for the construction of a fence. Freviously, Fuethitz was one of seven occupied airfields in Mastern Germany which were not yet surrounded by a fence.
	(h)	Frevious sources also observed up to 60 MiG-15s at the field. This indicates that, in early June, the field was occupied by two fighter regiments which was also confirmed by another source. Each regiment is probably equipped with about 30 MiG-15s as all the other fighter regiments of the Twenty-Courth Air Army.
	(5)	The report does not contain new information but only confirms that the field is still occupied by two fighter regiments.
